Professional Summary

AI Consultant and AI Platform Architect with **13+ years of experience** delivering **enterprise-scale AI, Generative AI, and cloud-native platforms** across healthcare, life sciences, and regulated industries. Strong expertise in **Azure OpenAI, GenAI agents, LangChain/ LangGraph, cloud architecture (Azure & GCP), microservices, and DevOps**.
Proven track record in **AI-driven modernization**, including large-scale **on-prem to Azure migrations**, **AI agent platforms**, **FHIR/DICOM healthcare interoperability**, and **enterprise-grade CI/CD and IaC**. Trusted advisor to leadership and engineering teams, translating business problems into **secure, scalable AI solutions**.

Core AI & Cloud Consulting Skills

Generative AI & AI Platforms

- Azure OpenAI, Generative AI solutions
- AI Agents & Orchestration (LangChain, LangGraph)
- Prompt engineering, Retrieval-Augmented Generation (RAG)
- AI governance, security, and enterprise adoption

Cloud & Architecture

- Microsoft Azure (primary), Google Cloud Platform
- Enterprise landing zones, VNET design, identity & security
- Multi-cloud and hybrid (on-prem → Azure)
- Serverless, containerization, AKS

Healthcare & Data Interoperability

- FHIR, FHIR Store, DICOM
- Healthcare APIs & imaging platforms
- HIPAA-aligned architectures

DevOps & Automation

- CI/CD (Azure DevOps, GitHub, Jenkins)
- Infrastructure as Code (Terraform, ARM)
- Kubernetes, Docker
- Observability (Grafana, monitoring, log analytics)

Consulting & Leadership

- Architecture governance & roadmaps
- Stakeholder & executive communication
- Technical leadership & mentorship
- Agile / Scrum delivery

Professional Experience

AI Consultant / AI Platform Architect
Tata Consultancy Services (TCS)
Mar 2023 – Present | Bengaluru, India

- Designed and delivered **enterprise AI and Generative AI platforms** using **Azure OpenAI** to improve operational efficiency and healthcare innovation.
- Architected **AI agents** for healthcare workflows and data-driven automation.
- Led **large-scale on-prem to Azure migrations**, improving scalability, reliability, and compliance.
- Defined **AI reference architectures, reusable cloud patterns, and governance standards** adopted across multiple programs.
- Partnered with business leaders and engineering teams to align **AI strategy with business outcomes**.

Cloud Architect / AI Solution Architect
CIGNA Corporate Services / Johnson & Johnson Services Inc
Nov 2022 – Feb 2026

- Led **end-to-end migration of GE Healthcare's on-prem datacenters to Microsoft Azure**, including **80+ TB of live data**.
- Implemented **cloud-native microservices on AKS**, accelerating deployments and improving system resilience.
- Designed **FHIR-based APIs and healthcare integrations** across Azure and GCP.
- Built **enterprise CI/CD and IaC pipelines** (Terraform, ARM), reducing provisioning time and operational risk.
- Automated multiple **Dynamics 365 (D365) modules**, reducing deployment time by **~40%**.

Technical Lead
Capgemini Engineering
Oct 2019 – Jan 2022

- Led teams delivering **cloud, DevOps, and modernization initiatives**.
- Worked with telecom clients on **5G, IoT, and cloud platforms**.
- Established CI/CD best practices using Azure and GCP.

Senior Software Engineer
Siemens Healthineers
Jul 2017 – Oct 2019

- Migrated a **DICOM-based monolithic healthcare system** to **microservices** with CI/CD.
- Used **AKS, ACI, ARM templates, and DevOps pipelines** for scalable delivery.
- Improved deployment reliability and team velocity.

Earlier Experience

- **Sr. Associate – Technology**, Synechron (Morgan Stanley)
- **Application Engineer**, Raw Engineering
- **Associate Software Developer**, Tresbu Technologies

Key AI & Cloud Achievements

- Architected **enterprise Generative AI solutions** leveraging Azure OpenAI.
- Delivered **large-scale healthcare cloud migrations** with compliance and security.
- Designed **AI-powered healthcare platforms** using FHIR & DICOM.
- Established **cloud governance and AI best practices** across organizations.
- Reduced infrastructure provisioning and deployment times through automation.

Certifications & Awards

Certifications

- Generative AI Fundamentals (Academy Accreditation)
- DevOps Foundation (Internal)
- Domain Advisory – Foundation Curriculum

Awards

- **TCS AI Idea Igniter (2025)**
- **TCS AI Spark (2025)**
- **Xcelerate Warrior Certificate (2025)**
- Microsoft OpenHack Participation
- Cisco 50K Service Milestone

Education

Bachelor of Engineering (Electronics & Communication)

Visvesvaraya Technological University | 2008 – 2012
